VICTOR PAK
SOFTWARE ENGINEER

Summary

I am a full-stack web developer looking for new opportunities to grow and develop my programming skills in a variety of practices. I have experience in working in both an individual and group setting utilizing Python, Ruby and JavaScript(MEAN) to develop new project applications. I can also quickly adapt to current goals and objectives.

Projects

Housing Crime

GitHub: https://github.com/zhongraymond/Housing_Crime
Link: http://54.191.108.91/

Key team member that developed "Housing Crime", which allows people to check if there was any crime happened for the past 2 weeks in particular area of San Francisco along with the listing houses. The whole idea is to show people if that particular area, they are planning to purchase a property, is safe.
Used technologies:
Python, Django, Google Maps API, SF Crime API, SF Real Estate Database, Bootstrap, jQuery, JavaScript

SpaceRanger

GitHub: https://github.com/09pve09/SpaceRanger
Link: http://54.191.83.44/

Creator and developer of a simple side view game called SpaceRanger that utilizes MEAN and canvas from HTML5.
Technologies used:
Mongoose, Express.js, AngularJS, Node.js, HTML5

Food Find

GitHub: https://github.com/conniechu929/rails_project
Link: http://52.40.131.196/

Key team member that developed "FoodFind", which allows users to view photos of the restaurants that are near them. If the user likes the photo, they can click on "like" button and see the full information about this location, along with the directions.
Used technologies:
Ruby on Rails, Google API, Yelp API, Yelp Fusion API, Bootstrap, Postgress, jQuery, JavaScript.

Bill Pay

GitHub: https://github.com/conniechu929/billpay
Link: http://34.223.251.157/

Key team member that developed "BillPay", which allows users to manage, keep track, and pay bills all in one convenient place. This project is still on going.
Used technologies:
Python, Django, Bootstrap, jQuery, JavaScript

Soft Skills

Adaptability
Quick to adapt to new environment

Information Retention
Competent in learning quickly while easily retaining large amount of information

Problem Solving
Able to analyze problems and effectively search for ways to resolve them

Communication
Able to interact and effectively communicate with people from different backgrounds all while providing a good workflow and friendly environment.

Collaboration
Fully engaged with working together with a team to achieve maximum efficiency and task implementation
